

**Inno at Milan furniture fair 12<sup>th</sup> – 17<sup>th</sup> April 2016**

In Milan we are presenting several novelties as part of the "Cozy Office" concept that we have developed under the years by leading a part of our product development to a more relaxed and homelike direction. Our aim with the crossover products that differ from the mainstream is to offer novel and inspiring furniture to be used in spaces where humane and individual values and comfort are important also in traditionally conventional public spaces. In this way we intend to improve the client company's productivity. Quality, ergonomics, usability and responsible production combined with internationally recognised design that stand the test of time are important cornerstones to Inno. The products meet the most demanding requirements of public interiors. Sources of inspiration are people, positivity and wellness. Welcome to our stand 20F22!

**AURA WOOD** design Mikko Laakkonen

Aura Wood is a natural extension to the Aura family. With its wooden frame and standard height Aura will be entering the use range of regular lounge seating yet preserving the characteristics of the award-winning Aura series. Aura product family has been granted the internationally recognized GOOD DESIGN™ 2015 Award. Aura sofa was awarded the red dot: best of the best 2013 design award for its elaborate and innovative design.

**KOLA BAR** design Mikko Laakkonen

Kola Bar is an appealing bar chair suitable also for meeting rooms with high tables. Kola is aesthetically and weight wise a light family of chairs making it fit both public and private modern interiors. The seat, manufactured of 100% recyclable polyester felt, is part of the supporting construction. The upholstered cushion gives extra comfort and allows the use of playful colours. Kola has been awarded with the red dot award: product design 2012, Fennia Prize 2012 and Good Design Award 2010.

**TURNER** design Susanne Grönlund

Turner is a clever and light wall attached coat rack with three wooden knobs for hanging clothes. One of the knobs is longer which allows the use of a coat hanger. The laser cut metal part between the knobs gives the coat rack an interesting and graphical appearance. Distinctive combinations can be created by installing several coat racks to the wall in different positions. The wooden knobs are made of solid oak and the metal part is epoxy coated in black colour.

**LAB** design Harri Korhonen

Cozy convention of the Lab table and chair series is continuing with a new meeting chair. The softness of the chair has been created through a plain quilted seat. The Lab table system includes several size categories, cable management options and high tables for productive stand-up meetings. The Lab product family has been granted the internationally recognized GOOD DESIGN™ 2015 Award.

**BASSO S** design Harri Korhonen

Basso S is a streamlined chair with remarkable sitting comfort in the distinguished family of meeting chairs. Basso creates discreet reliability and even playful ambiance particularly in meeting rooms. Available with or without armrests.

**JULIE** design Julie Tolvanen, 2015

Julie is the result of a persistent design process where curved veneer slats form a beautiful back and armrests for this light looking, sculptural wooden small chair for dining and meeting purposes. Available with or without seat upholstery. Julie has been granted the internationally recognized GOOD DESIGN™ 2015 Award.

**BONDO** design Harri Korhonen

The light structure, beveled table top edge and soft shape of Bondo create an aerial impression. The tables overlap each other slightly which allows for organic layouts. The table is available in different sizes including a small side table to be used as a laptop or writing table in groups that consists of sofas and armchairs. The Bondo table range is also available with a wooden leg option that was launched at Stockholm Furniture Fair 2016.
